TURNING INSERT

turning insert DCGT11T304F-NC2 AW100K

SPECIFICATIONS

Wenof thechneidplattenform	55°
freewinkel	7°
Toleratz	0,130mm
Klemmtyp	T
Schneidelänge	11mm
Plattendicke	3,97mm
Eckenradius	0,4mm
Kattenpräparation	Scharfe Schneidkante
Spatbrecher	NC2
weight	0,10 kg

BEREICHE

Anwendungsbereiche von Wendeschneidplatten von Steinen

This chart maps various material groups (e.g., cast iron, steel, stainless steel, titanium, aluminum, copper, brass, nickel alloys, and composites) to specific insert grades. The chart is color-coded by material group and includes columns for recommended grades and their corresponding grades.

BEREICHE

Anwendungsbereiche nach Kennzahl

This chart provides a more detailed application guide, likely correlating material groups with specific insert grades based on a key number system. It includes columns for material groups, recommended grades, and their corresponding grades.
